

About You b1) I have a good idea, but don't have the money to lease a high end server for a 4-6 months. b2) I managed cPanel, DA and Plesk servers since 2001. b3) [[REDD]] b4) no

About Your Vision c1) Become the number one place for web developers to work on customer projects. c2) There are only a handful of VPS providers dedicated to programmers and software development. If I can create a simple to use interface to order, configure and reset a VPS, I think programmers will appreciate it. c3) linux knowledge and can use google:), 14 year programming experience c4) Ambition, great community, great service. c5) I need the money to rent a server for a few months until I have enough clients to pay the bills.

Building Your Vision d1) individual programmers and companies with many programmers d2) advertising on specialty sites, guest posts on blogs, forums, direct marketing to webdesign/programming companies across Romania, Hungary and Austria, word of mouth... d3) YES d4) yes, I will hire part-time a good copywriter and a sales person.

Your Capabilities To Serve Your Vision? e1) I'm a very good PHP/SQL programmer, and I'm a decent sysadmin. e2) I solve all problems that come my way...one way or the other. e3) 4-6 hours every day e4) if it works out, after 6 weeks, I will start my own company and will be dedicated to it, full time.

Plans and Projections f1) OpenVZ f2) 1 f3) max. 1.5 Ghz CPU, 1GB RAM, 6 GB HDD for \$10/month - uptime 24 hours

and \$5/month - VPS is up ONLY while the developer is logged into the control panel.

Special deals for companies with many developers, with more VPSs.

f4) 50 accounts f5) 150 accounts f6) 500 accounts f7)

2000 accounts

Margins & Profits g1) 130% g2) 80-100 depends if I have more clients with 24 uptime or only when logged in. g3) \$250 g4) 0 g5) \$700 g6) \$400
